

HAMMAD HAMID KHAN

Full Stack (MERN) & AI Developer

hammadngml@gmail.com | 0318 4121783 | [linkedin.com/in/hammad-hamid](https://www.linkedin.com/in/hammad-hamid) | github.com/hammad-124 | huggingface.co/Hammad-Hamid

PROFESSIONAL SUMMARY

Full Stack & AI Developer with 1.5+ years building and shipping production-grade applications on the MERN stack (MongoDB, Express.js, React.js, Node.js) and AI-powered systems. Experienced across the full lifecycle – scalable REST APIs, real-time features, RAG pipelines, LLM fine-tuning, and agentic workflows. Skilled at integrating third-party services and deploying containerized apps with Docker on AWS. Focused on building fast, intelligent, and scalable products.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, Redux Toolkit, React Query, TanStack, Tailwind CSS, Material UI, Bootstrap, HTML5, CSS3, JavaScript (ES6+)

Backend: Node.js, Express.js, FastAPI, Wagtail CMS, REST APIs, Socket.IO, WebRTC, JWT Auth

Databases: MongoDB (Atlas, Aggregation, Vector Search, Change Streams), PostgreSQL, MySQL, Supabase

AI & ML: LLM Fine-Tuning (PEFT, LoRA, QLoRA), RAG, LangChain, LangGraph, Hugging Face Transformers, OpenAI API, Gemini API, Prompt Engineering, AI Agents & Tool Use, Vector DBs (FAISS, MongoDB Atlas)

DevOps & Tools: Docker, Git, AWS EC2, Vercel, Railway, Stripe, Twilio, ElevenLabs, DocuSign, Cloudinary, Figma Plugin API, Claude, Cursor, MVC, ORM

Languages: Python, JavaScript, TypeScript, SQL

PROFESSIONAL EXPERIENCE

Associate Software Engineer — Aextra Studios

Jun 2025 – Present |

Lahore, PK

- Designed and delivered 4+ production-grade platforms (SaaS, e-commerce, AI pricing agents) on the MERN stack with Socket.IO real-time features, MongoDB aggregation pipelines, and role-based authentication.
- Integrated third-party APIs including OpenAI, Twilio, ElevenLabs, Stripe, Mailchimp, and DocuSign; built a scalable CRM with a Django + Wagtail CMS backend and React.js frontend.
- Incorporated Hugging Face Transformers (sentiment analysis, keyword extraction) and a Gemini AI agent for product suggestions into a production AI product.
- Deployed across AWS EC2, Ubuntu VPS, Railway, and Vercel; containerized with Docker and managed structured Git branching (dev/staging/main).
- Leveraged Claude and Cursor as AI pair-programming tools to accelerate feature delivery, code refactoring, and debugging across production codebases.

MERN Stack Developer — MAGMA3C

Oct 2024 – Mar 2025 |

Lahore, PK

- Built a full-stack construction marketplace (zameen.site) using MVC architecture with role-based access for admin, manufacturer, partner, and customer roles.
- Developed the backend with Express.js and Node.js, and the frontend with Next.js and Redux for global state management.
- Created dynamic dashboards, product templates, and data pipelines using MongoDB aggregation with MUI and Tailwind CSS.
- Contributed to kuchbhi.io (bidding marketplace), implementing search and real-time frontend-backend synchronization.

KEY PROJECTS

SWISS touristy — Multi Agent Ai Platform — [swisstouristy.com](https://www.swisstouristy.com) — React.js, FastApi, OpenAi, langchain, MCP

- Architected a multi agent AI dashboard orchestrating 9 specialized agent, including booking ,trip planner , seo to automate content generation,routing and travel planning workflow
- Automated dashboard with built in MCP for handling different workflows

54 Crates — Music Streaming Platform — [54crates.com](https://www.54crates.com) — React.js, React Query, Node.js, Express.js, MongoDB (MERN)

- Built a full-stack MERN music streaming platform with genre browsing, album discovery, charts, playlists, and a full audio player with playback, volume, and track navigation controls.
- Developed a RESTful Node.js/Express.js backend for the music catalog, genre filtering, and playlist management; used React Query for server-state caching and background sync to cut redundant API calls.

QuickGrid — AI-Powered Instagram Design Platform — [quickgrid.ai](#) — *React.js, TypeScript, Node.js, Figma Plugin API*

- Contributed to a full-stack AI-powered social media design platform enabling users to create Instagram posts through an in-house canvas builder; developed core canvas creation features with real-time rendering and interactive design tools.
- Built and published a Figma plugin that allows designers to convert their Figma designs directly into QuickGrid-ready templates, bridging the gap between design workflows and content production

Rekvestor — Customer Feedback & Market Intelligence Platform — [rekvestor.com](#) — *React.js, Node.js, Express.js, MongoDB*

- Built a full-stack customer feedback platform enabling businesses to collect real-time insights from their audience to improve products and drive revenue growth.
- Developed dynamic feedback forms, analytics dashboards, and audience segmentation features; integrated email notification workflows and RESTful APIs for seamless data collection.

Recommendation Assistant — [github.com/hammad-124/RAG-Application-Assistance](#) — *Express.js, MongoDB Atlas Vector Search, LangChain, OpenAI Embeddings*

- Built a production RAG assistant using LangChain and OpenAI embeddings for semantic inventory search, outperforming keyword-based queries with MongoDB Atlas Vector Search.
- Developed a real-time ingestion pipeline with MongoDB Change Streams for automatic re-embedding; optimized latency with caching (TTL), connection pooling, and prompt tuning.

Fine-Tuned LLM — Axtra Model — *Python, Hugging Face Transformers, PEFT, LoRA, QLoRA*

- Fine-tuned a domain-specific LLM using PEFT/LoRA and memory-efficient QLoRA on custom datasets; published and deployed on Hugging Face.
- Optimized performance via prompt engineering, hyperparameter tuning, and evaluation on custom benchmarks.

Refine AI — AI-Driven CRM (Final Year Project) — *React, Redux Toolkit, Django, Wagtail CMS, PostgreSQL, Hugging Face, Gemini*

- Built an AI-driven CRM with sentiment analysis, keyword extraction (Hugging Face), and a Gemini AI agent for product improvement suggestions; integrated Stripe payments and multi-step onboarding for SaaS monetization.

EDUCATION

BS in Computer Science — Government College University, Faisalabad	Sep 2021 – Sep 2025
F.Sc. Pre-Engineering — Government Islamia College Civil Lines, Lahore	Aug 2017 – May 2019

CERTIFICATIONS

Delta 3.0 Full Stack Development — Apna College • Web Development — Peak Solution Colleges
